The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites "general formula (1)". This formula recites two separate species. It is unclear how these species are or are not related.

Appropriate clarification is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Ma et al '085.

Ma et al disclose ABC triblock copolymers suitable for ink jet applications (abstract). These copolymers are taught as comprising an ionic A block, a hydrophilic B block which may comprise acid or amine monomers and a C block which may be hydrophobic and comprise monomers as recited in instant claim 5 (column 4, line 13 to column 5, line 48).

Regarding applicants' limitation to "upper limit hydration temperatures", it is the position of the examiner that acid and amine functional polymer blocks of the reference

would inherently exhibit this property since there is no evidence presented to the contrary.

Regarding the apparatus limitations of instant claim 11, it is the position of the examiner that these limitations are met by any typical ink jet apparatus and therefore are seen as fully disclosed by the reference.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '222.

EP '222 discloses ink jet apparatus and head kits meeting the limitations of the rejected claims (abstract, claims 61 and 77).

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F, 10:00-6:30.
